## WELCOME TO OUR 16TH ANNUAL SUN COUNTRY BULL & FEMALE SALE

We started this sale with one main objective in mind, that is to provide breeding stock that will work for commercial and purebred breeders alike. We feel that this year's offering is one of the strongest sets we have ever offered. They have been culled several times on structural correctness and they are ready to go to new homes and work for you.

We have moved our sale date to a couple weeks later in March this year, in hopes that we can have a normal sale with people in the seats. Hopefully we haven't just moved the date of the blizzard that has hit our sale date for the past few years. Whatever the weather throws our way, we plan to have the cattle available for viewing the day before the sale as well as on sale day. The sale will be broadcast live on DV Auction, so you can bid from your home computer if you need to, but we hope many of you can join us on sale day in Moose Jaw. The owners. And sale representatives will be available to answer any of your questions.

The cattle industry looks very bright into the foreseeable future and producing the highest quality cattle you can has never been more important. North American cow herd numbers are at a 60 year low which is reflected with very strong market prices. The premiums for growthy, efficient, troublefree cattle will only get bigger. This is the type of cattle we have tried to produce.

We are again offering to take these bulls and heifers back to our farms and keep them for a reasonable length of time until shipping arrangements can be made. If you pick your bull or heifer immediately following the sale, we will offer you a discount of \$100 per head.

We will be providing videos, current weights, scrotal measurements, and any other additional information we have on our websites in the near future. The videos of the sale offering will also be available at [www.dvauction.com](http://www.dvauction.com) and [www.johnstoneauction.ca](http://www.johnstoneauction.ca).

We hope you can join us on March 23rd. Come early and join us prior to the sale for a complimentary meal and fellowship with other cattle producers.

Grant Alexander (for the Sun Country group)

### SALE WILL BE ONLINE BY VIDEO AT [WWW.DVAUCTION.COM](http://WWW.DVAUCTION.COM)

Create your Bidding Account with DVAuction!

Go to [www.dvauction.com](http://www.dvauction.com) and click on "Create New Account".

Fill in all fields and accept the Privacy Policy & Terms and Conditions. Click on Create New Account.

- On the next screen, click **Apply for Bidding**.

Hollywood topped our 2021 sale at \$24,000 selling to Major John Gibb and family, Glenisla Shorthorns in Scotland. After his semen was collected he came back to our farm and we were able to negotiate for the Canadian walking rights in him. Now that we have sold most of our cows, it just doesn't seem right to have him stay here and eat grass all summer. He should be breeding in someone's herd. His first calf crop here exceeded our expectations and we could not be more pleased. He was used on cows and every calf

was born unassisted and they had excellent vigor at birth. Hollywood is defect free, myostatin free and homozygous polled. He has superb feet and legs and is extremely easy fleshing and has outstanding performance. The best herd bulls have a great mother. His dam is our Rene Dottie 72R, who is still producing embryos at 18 years of age. Hollywood sells with 70 straws of semen that is stored at Alta Genetics

Here is a coming two year old that is sired by Royalla Rockstar that has set so many records in Australia. His sons in the Royalla sale last year averaged over \$18,000. His dam is a maternal sister to Waukaru Patent 8161 ET and she is sired by Kamilaroi Meat Packer which makes Jackaroo to be 3/4 Australian bloodlines and an outcross to most Shorthorn genetics in Canada. We used him on all of our yearling heifers last summer. He is defect free and myostatin free by pedigree. BW 88 lbs unassisted.

A maternal brother to HC North of 49 55G that is herd sire at Wernacres in Illinois. He is sired by HC Hardcopy 12H who sold in this sale in 2021 at \$12,500. 31K has been outstanding since birth and he just keeps getting better and better. I consider him one of the best bulls we have ever offered in this sale since it started. Defect and myostatin test results will be available before sale day. BW 83 lbs unassisted.

Here is a bull with a bit more performance. He is sure to add length and pounds to your calf crop. His dam is a powerhouse out of Alta Ceder Trademark 59T. At 8 years old she still has a perfect udder and produces one of the top calves year after year.

DIAMOND CREEK CATTLE CO

**How Much Can you Afford to Pay for a Better Bull?**  
Increase in pounds per calf from a top performance bull  
X Number of cows bred to him each year  
X Number of years to keep the bull  
X Expected selling price of calves  
= Additional dollars you can pay for a better bull

**Example: A bull that will add an additional 30 lbs to the weaning weight of each of his calves mated to 25 cows per year for 4 years and if you sell the calves at \$2.50/ lb**  
 $30 \times 25 = 750 \text{ lbs} \times 4 \text{ years} = 3000 \text{ additional lbs}$   
 $3000 \times \$2.50/\text{lb} = \$7500.00$

**This bull is worth \$7500 more than the average bull who will keep your weaning weights the same. Take this formula and put in your own figures.**

Source: Saskatchewan Stock Growers Association

We made the selection of our bulls this year when they were weaned, then again when they were yearlings, before going out to grass. We selected again, when they came off grass. They have been fed a grower ration.

This set of bulls is our most even set we have offered for sale. They are all good footed, well muscled, and deep bodied. You can contact us for more information on any specific bull.

The "new" North American Shorthorn Genetic Evaluation is now finally completed and you will notice a difference between today's EPDs and those in past years. These EPDs were completed by the American Simmental Association as part of their multi-breed genetic evaluation. These EPDs now have the same "base" as Simmental, Red Angus, Gelbvieh and a growing number of other breeds. As a result, our EPDs can now be compared with these breeds. This means that bull and female buyers can search for genetics from multiple breeds and compare the performance profiles against one another.

### Birth Weight (BW)

At the basic level, birth weight is nothing more than an indicator trait for calving ease, but the emphasis on birth weight can be overdone. Economically, over selecting for low birth weights can take us in the wrong direction; cattle still sell by the pound. Use BW EPD in conjunction with calving ease. Phenotypic traits like length of body, shoulder design, head shape, circumference of bone and even frame score play a significant role in determining birth weights and calving ease.

### Weaning Weights (WW)

Put simply, weaning weight is the ability of a bull's calf to dry off, stagger to its feet, and grow like mad. Finding a sire with a strong WW that also excels in other economically relevant traits important to your breeding program is a key element to success.

### Yearling Weight (YW)

This trait is economically important since it is more indicative of growth potential through market weights taken early in the animals life. Single trait selection for YW can lead to serious problems that can affect bottom line profit. Mature must be monitored when selecting a bull for performance via YW EPD. Cow maintenance costs, calving difficulty, and even breeding problems can result. YW EPDs can be very influential if you understand your environment conditions or if you are retaining ownership in your calves from birth to slaughter.

### Milk

A bull's Milk EPD is determined by his daughter's ability to wean heavier calves than her contemporaries. Just because a cow weans a heavier calf each year does not necessarily mean her Milk EPD should be the highest in the herd. The performance of her calf can also be attributed to the dam's or sire's growth genetics or a number of environmental factors. Milk EPDs can be too high for your environmental conditions especially in severe environmental conditions and can have a negative impact on rebreeding rates.

## Bull Warranty

We guarantee to provide you with a sound, fertile bull, capable of servicing a reasonable number of cows. In the event that your bull is a non-satisfactory breeder, the seller will not, under any circumstances, be responsible for more than the original selling price of any bull sold in the sale. The consignors will not provide replacement or credit for any physical injury or mismanagement. Therefore, we stress the importance of insurance on your bull. An insurance agent will be available on sale day.

We also realize that breeding season is also a very busy time on most farms. We would ask that you check your new bulls periodically, so that if there are problems, we can hear about them sooner rather than later. This is equally important for the bull buyer as well. If your bull is not breeding, or becomes injured, it is important to resolve the problem as soon as possible in the breeding season.

Owned with Martyn Moore, England. Her dam was our high selling female in our sale in November. She was a full sister to Hill Haven Fire Storm 28C who has sired so many excellent calves throughout the world. 12K is sired by Hollywood who sells as lot 1 in this sale. This heifer is long bodied and structurally sound. BW 90 lbs unassisted.

Another Hollywood daughter that got off to a slow start as her mother was 16 years old when she was born and her milk production was starting to slow down. She is a late April heifer and I decided to put her in this sale because I know that she will develop into a solid brood cow as her pedigree is stacked full of excellent producers. Her dam was also a donor that has lots of progeny in Scotland. BW 82 lbs unassisted.

This is the best Bayview Unique K11 daughter we have produced. Her two year old dam did a great job raising this heifer as she weaned at 750 lbs with no creep. This heifer is a tank! She is built right and still is feminine fronted. You could drag her to some shows and compete and then turn her out and have a tremendous brood cow as well. BW 72 lbs unassisted.

**Bidding:** Each animal will be sold to the highest bidder. Bidding Disputes: The auctioneer will settle any disputes as to bids, and his decision on such matters shall be final.

**Terms:** The terms of the sale are cash, unless previous arrangements have been made with the owner. The right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the sale facility.

**Purchaser's Risk:** Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time. If leaving your bull in our care we strongly encourage you as the new owner to insure him.

**Insurance:** A representative of a major insurance company will be present to care for insuring cattle. Sellers hold no liability for cattle left in their care.

**Certificate of Registry:** A certificate of registry and transfer will be furnished for each animal.

**Announcements:** Changes of information contained in this catalogue relating to the animals offered for sale will be announced from the auction box and such announcements shall take precedence.

**Health:** All cattle will be in excellent health.

**Breeder's Guarantee:** All animals sold are guaranteed breeders by the owner. Any animal that has not proven itself a breeder within six months after date of sale, if in healthy condition, may be returned to the seller at buyer's expense. The seller reserves the privilege of trying for a period of six months to prove the animal a breeder. The seller at his option may either return the purchase price to the buyer or replace the animal with another of equal quality in full settlement of ALL claims.

All complaints regarding breeding difficulties must be reported in writing by the buyer to the seller within the specified time above and any animal returned must be free from disease and in good health.

**Retained Interest:** In the event that an owner wishes to reserve the right to collect semen from any bull in the sale, it will be announced prior to the sale and from the auction block as well. Semen will be collected at the buyer's convenience and at the seller's expense, and it will only be available for use in the seller's herd.

**Liability:** Neither owners, sale manager, clerks, nor anyone connected with the sale assumes any responsibility, legal or otherwise for damage of any kind.

**Contract:** The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.
